BootStrap
jQuery
Webpack
Gulp
Rest API
Axios
Git (GitHub)
Figma

Language

English - B2
Russian - Native

Egor Maiseychyk

Front-end/Full-stack developer

I'm a Front-end developer with about 1 year of development experience in creating SPA (Single Page Applications).

I'm ready to learn new technologies and aspire to become an experienced frontend developer, working on cool projects and constantly improving their professional and personal qualities.

I'm always open to new opportunities and would be happy to chat and consider your proposals.

Experience

Engineer-programmer (08.2021 - present)
Akmenita
- **Creating a company's website**

(JavaScript, React.js, MongoDB)

Took an active role in developing a component and implementing it. Added site authentication, enhancing the overall user experience.

Pet Projects

- **Full-Stack MERN Blog**

(Express.js, React.js, Node.js, NongoDB)

I've created a functional blog that includes user authentication, post creation, and editing. Each user can leave comments under each post. Post views are tracked with a counter, and most popular adds in special category, that based on popularity.

- **Online Shop**

(React, Tailwind, Redux)

I've created an online store using a FakeAPI. It features sorting of products by categories, popularity, and price. Users can register, log in to their accounts, and add items to their shopping cart. The cart's content is editable, and users can proceed to place an order, which then enters processing.

You can explore these and many my other projects in my portfolio.

Courses

Udemy
- **Web-development** (The basics of Html&Css, preprocessors Sass/Less, Adaptive layout)
- **React + JavaScript** (React, Redux, Native JacaScript)
- **TypeScript** (Decorator pattern, Generics, Type Manipulations)
